Database of sustainable infrastructure tools: <https://sustainable-infrastructure-tools.org/>
- **OrathaiP TEI_Moderator** 05:35:21
Dear Participants, If you have any questions/suggestions, please feel free to share them in this chatbox.
- **Chengchen Qian – UNEP** 05:41:16
Q to Dr. Sujitra: How to encourage local municipalities to move from end-of-pipe solutions for MSWM like landfill and WTE to upstream measures like source separation? What are the funding options? What are the main barriers?
- **OrathaiP TEI_Moderator** 05:41:32
Dear Participants, kindly post/share your question on the Q&A box.
- **Narumon AIT** 06:01:34
Thank you for your participation! Please give us your feedback on this webinar: <https://forms.gle/svM6hVzxyjYAXu9A9>

5. Q & A

NO.	Question	Asker Name
1.	How can be water used for daily life recover even in pandemic situation?	Syeed Shoaib
2.	How to improve the fund policy of green buildings to be more scientific and practical in China?	Jul
3.	What do you think is the feasibility of spreading the case of Shenzhen green buildings in other parts of China?	Doreen wang
4.	How can I incorporate my SDG project with UNEP or AIT?	Navid Bin Ahmed
5.	Do we have any advantages if we burn all of solid waste in high temperature burner and generate electricity instead of doing separate recycling treatment?	AUNG ZAW MIN
6.	@Dr. Sujitra, How can we encourage municipalities or organization to move ahead specially in Thailand for contaminated waste like masks, ATK kits that are directly going to landfills now. Is there a policy that is being proposed? And secondly is there any consideration to have small waste recycling plant at individual medium and large organization similar to water treatment plant as part of the Thailand law. How are they addressing it in Korea and China.	Anonymous Attendee
