COMMUNITY-BASED TOURISM DEVELOPMENT: EXPERIENTIAL LEARNING FROM THAILAND

5th - 14th August 2019
Asian Institute of Technology (AIT)
Thailand

::: ABOUT COMMUNITY-BASED TOURISM :::

For many decades, it has been confirmed that tourism is one of the world’s fastest growing industries and a major source of incomes for many countries. Developing countries have experienced increased national revenue, better job opportunity, growth of rural economy and extensive development of public infrastructures.

In view of Sustainable Development Goals (SDGs), community-based tourism is being known as one of vehicles that helps gearing toward no poverty, reduced inequality and engagements of local stakeholders. The better understanding of sustainable community-based tourism and community-based tourism empowers the communities to protect and maintain the socio-cultural values and natural and cultural heritage resources. It will also help them to manage and administer the tourism by local efforts and resources.

This training program is designed to offer the better understanding of key principles and practices on community-based tourism development which is applicable for local people, local government and tourism operators.

::: OBJECTIVES :::

After this training program, participants will be able to:

- Have more awareness of the impacts of tourism to the community and country economy
- Review keys concepts for enhancing understanding of community-based tourism
- Explore approaches to engage community and integration of local values into community-based tourism
- Identify important areas to develop strategy and plan for community-based tourism management
- Be acquainted with knowledge transfer alternatives for enhancing capacity of stakeholders
