

Professional Training Programme on

"Tackling Climate Change: Integrating Loss and Damage, Adaptation and Mitigation"

30 September - 6 October 2024

Background

Climate change is one of the most pressing global challenges of our time, impacting ecosystems, economies, and communities worldwide. The adverse effects of climate change, such as extreme weather events, rising sea levels, and loss of biodiversity, threaten sustainable development and exacerbate existing inequalities. These changes pose severe risks to ecosystems, human health, food security, water resources, and economic stability worldwide. Addressing these challenges requires a multi-faceted approach that integrates justice, advocacy, negotiation, adaptation, and finance.

Given the complexity and scale of climate change, there is a growing need for professionals who are well-versed in integrated climate strategies. This comprehensive training on "Tackling Climate Change: Integrating Loss and Damage, Adaptation and Mitigation" aims to equip participants with the knowledge and skills necessary to address various aspects of climate change as well as to develop and implement effective climate action plans. Through this program, participants will gain a deeper understanding of the interconnected nature of climate challenges and learn to design and implement strategies that contribute to a more resilient and sustainable future.

The programme has been designed for policymakers, environmental professionals, civil society representatives, academics and researchers, private sector stakeholders, community leaders contributing to climate-resilient livelihoods for the disadvantaged group and will be coordinated by AIT Extension at the Asian Institute of Technology in Thailand.

Training Contents:

- Climate justice: principles, concepts, frameworks, and case studies on global perspectives
- Mechanisms & strategies for addressing loss and damage
- Explore various adaptation methods and practices to build climate resilience
- Exposure visits to model smart farms and small-scale farming practices using cutting-edge technology to combat climate change in Thailand
- Experiential learning on climate mitigation strategies and technologies
- Effective climate advocacy & negotiation skills for climate action
- Climate finance: key funding sources and mechanisms
- Strategic planning, integration and way forward to climate action

Training Fee:

USD 1500 / person.
